

TF-VRM2-A-0501 Precision manifold - R32

The **Value Navtek TF-VRM2-B-0501** precision gauge features an innovative design and increased accuracy, thanks to ball valves.

Class 1.0 accuracy index

For refrigerants **R32, R134a, R404A, R407C**

- Innovative and unique design
- Exceptional protection and impact resistance with its integrated shell
- High precision gauge - **Class 1.0**
- Folding, hidden mounting hook for ease of use
- High reliability with ball valves
- Carrying case included

General Characteristics

| | |
|-----------------------|---|
| Weight | 2.9 kg |
| Refrigerant | R32 - R134a - R404A - R407C |
| Gauge diameter | 80 mm |
| Pressure scale | -30inHg ~ 400 psi -30inHg ~ 350 psi |
| Hose | Red 1/4" - 1/4" Yellow 1/4" - 1/4" Blue 1/4" - 1/4" |
